These programs are independent of your property assessment. You can apply for exemptions regardless of whether you file a property tax appeal. Even if your assessment is accurate, you may be overpaying taxes simply because you have not applied for exemptions you qualify for.

Exemption programs and eligibility requirements change periodically. The information above is current as of 2026-03. Verify current requirements with your county assessor's office before applying.

Reassessment Protection Guide

Understanding what triggers a reassessment of your property can help you protect your current assessed value and avoid unexpected tax increases.

Actions That May Trigger Reassessment

- **Building permits:** Pulling a permit for renovations, additions, or structural changes will typically notify the assessor of improvements to your property.
- **Major visible renovations:** Exterior improvements such as new roofing, siding, additions, or added structures (pools, garages, ADUs) may prompt a reassessment even without a permit.
- **Listing on MLS:** Listing your home for sale, even temporarily, can expose a higher market value to the assessor, especially if the listing price significantly exceeds your current assessed value.
- **Refinance appraisals:** In some jurisdictions, a high appraisal obtained during refinancing can become part of the public record and influence your assessment.
- **Insurance rebuild valuations:** Replacement cost estimates from insurance claims can signal a higher property value.
- **Adding structures:** Pools, accessory dwelling units (ADUs), detached garages, and other permanent structures increase your property's value.

How to Protect Your Current Assessment

- **Document your home's current condition:** Take dated photos showing any deferred maintenance, needed repairs, or functional issues. This documentation can support a lower valuation if challenged.
- **Keep records of needed repairs:** Maintain a list of deferred maintenance items (aging HVAC, roof wear, plumbing issues). These reduce your home's value relative to comparable properties.
- **Understand your reassessment schedule:** Know when your county's next reassessment year is so you are not caught off guard by changes.
- **Review your annual assessment notice:** When you receive your notice of assessed value, compare it to the prior year and to recent comparable sales in your neighborhood.

Your state's reassessment cycle: Ohio reassesses property on a annual basis. Understanding this cycle helps you anticipate when your assessment might change.

What to Do If Your Assessment Increases

If your assessed value increases significantly, you have the right to appeal. The key steps are:

- Review your appeal deadline (see the Appeal Window section of this packet)
- Gather comparable sales data showing your home's actual market value
- Document any property-specific factors that reduce value (condition issues, location drawbacks, functional obsolescence)
- File your appeal before the deadline

Understanding Your Property Tax Bill

Your property tax bill includes more than just the base property tax. Understanding each component helps you identify which charges can be challenged and where potential savings exist.

Your Tax Breakdown at a Glance
Based on your current assessment of **$33,230** and annual tax of **$1,293.76**, your effective tax rate is approximately **1.36%**.
The effective rate includes all taxing jurisdictions (school district, county, city, and special districts) combined.

How Your Tax Is Calculated

The core formula is: **Assessed Value x Tax Rate = Base Property Tax**. Your total bill then adds special district assessments, voter-approved bonds, and various fees on top of this base amount.

Common Line Items You May See

- **School district levy:** Typically the largest portion (often 40-50% of total). Funds local public schools and sometimes community colleges.
- **County general fund:** Covers county services including roads, courts, public safety, and administration.
- **City/municipal tax:** Funds city services such as police, fire, parks, and infrastructure. Only applies if you live within city limits.
- **Fire/emergency services district:** Funds local fire protection and emergency medical services. Common in unincorporated areas.
- **Library district:** Funds local library operations and programs.
- **Stormwater/drainage fees:** Based on impervious surface area. Some jurisdictions bill these separately from the tax bill.
- **Voter-approved bonds:** Debt service on bonds approved by voters for schools, infrastructure, parks, or other public projects.
- **Solid waste assessment:** Some jurisdictions include trash collection fees on the property tax bill.
- **Special improvement districts:** Charges for lighting, sidewalks, or other neighborhood-level improvements.

Which Charges Can Be Challenged?

Challengeable **Ad valorem (value-based) taxes:** The core property tax based on your assessed value. This is what a property tax appeal addresses. Reducing your assessed value reduces this portion of your bill proportionally.

Separate Process **Special assessments and fees:** Flat-rate charges for specific services (stormwater, solid waste, special districts) often have their own dispute process. Contact your county for details.

Not Challengeable **Voter-approved bonds:** Bond levies approved at the ballot box generally cannot be individually challenged through the appeal process.

Where Your Tax Dollars Typically Go

While the exact breakdown varies by jurisdiction, a typical distribution of property tax revenue is:

~45%	~25%	~15%	~15%
Schools	County Services	City/Municipal	Special Districts

These are national averages. Your jurisdiction's breakdown may differ. Check your tax bill or county website for the exact distribution.

Where to Start

For maximum savings, energy efficiency experts recommend this order of improvements:

1. **Air sealing and insulation first.** This has the highest return on investment and enables right-sizing of HVAC equipment. Typical savings: 15-30% on heating and cooling costs.
2. **HVAC heat pump upgrade.** Heat pumps provide both heating and cooling, qualify for the largest rebates, and can reduce energy costs by 30-50% compared to traditional systems.
3. **Water heater replacement.** Heat pump water heaters use 60-70% less energy than conventional models and qualify for substantial rebates.

Federal tax credits require filing IRS Form 5695 with your annual tax return. State and utility programs may have different application processes. Program availability and amounts are subject to change. Consult with a tax professional regarding your specific eligibility.
